

Training - Train the trainers on dynamic simulators for switchboard operators

51081383-EN-P

Face-to-face only

1,5 days

This training enables trainers to use all the features of the instructor interface on each simulator

Level

Knowledge

Public

- Site trainers

Objectives

Attendees will be able to implement the following skills:

- connect to the cloud interface dedicated to the simulators and load a session for the chosen one
- start/stop or reset a set of initial conditions
- use the full functionality of the instructor interface on each simulator
- navigate the instructor interface of each simulator
- use the exercise library, manage and deliver a training session

Pedagogical & technical resources

- Practical case studies
- Interactive Educational
- Simulator exercises

Assessment of achievements

- Quiz

Prerequisites

No prerequisites are necessary to follow this course

Responsible

TotalEnergies Learning Solutions trainer, with expertise in the field and trained in modern teaching methods adapted to the specific needs of learners from the professional world

Program

DESCRIPTION

Introducing the cloud interface for simulators and the six different simulator models:

- BLM (Basic Learning Mode): a heater, a centrifugal compressor, a reciprocating compressor, a binary distillation column, a multi-flow column, and controls and instrumentation.

The first steps - loading BLM.

DYNSIM, use of the main features of the instructor interface.

Creation of a malfunction.

INTOUCH, the teaching interfaces for each BLM.

The library of exercises available.

Exercises using the library.

Manage a training session with the simulator.

Real-life training.
