

Training - Operational competency

51105177-EN-P

Face-to-face only

1 day

This training allows students to develop knowledge to improve their operational performance in the monitoring of industrial units or the performance of routine operations

Public

- External operators with more than 3 years' experience and young switchboard operators

Objectives

Attendees will be able to implement the following skills:

- apply good practices around rotating machines and ovens
- identify the basic concepts of oven technology and acquire a good understanding of their failures
- strengthen field operational efficiency (operator tours, shift changes, etc.)

Pedagogical & technical resources

- Practice
- Case Studies, REX
- Simulations on an educational platform
- Interactive Educational

Assessment of achievements

- Multiple quizzes

Prerequisites

No prerequisites are necessary to follow this course

Responsible

TotalEnergies Learning Solutions trainer, with expertise in the field and trained in modern teaching methods adapted to the specific needs of learners from the professional world

Program

DESCRIPTION

Operational safety and REX's analyses.

Technology of rotating machines (pumps, turbines, compressors) and the operation of equipment.

Furnace technology and operations.
